

SELLING ELECTRICITY MADE EASY

SELLING ELECTRICITY MADE EASY

e-POWER auctions make light work of selling electricity. We've been running online auctions since 2001, and our track record is evidence of their success.

The online format provides access to the whole UK electricity supply market, within a highly competitive auction setting - but the best thing is that you don't have to surf the web, or even click a mouse to take advantage of our consistently high prices.

Once you've signed up, we take care of everything. What's more, our charges are up-front, easy to understand and extremely competitive.

NFPAS
AUCTIONS

e-POWER AUCTION, BILLING AND SETTLEMENT SERVICES

We have been running electricity auctions since 2001, and have a proven track record of delivering highly competitive returns.

The main features of the e-POWER service are:

- » All technologies, including those that don't receive ROCs or LECs, may use our auction service
- » Auctions are held twice a year and will be for the full output from the generating station
- » The e-POWER service includes auction, billing and settlement
- » We can auction and administer the whole package - electricity, LECs, ROCs and REGOs
- » e-POWER gives you access to the whole UK electricity supply market within a highly competitive auction setting
- » Electricity may be sold subject to a reserve price
- » You will receive 80% of any triad benefit
- » Attractive cash flow with monthly payments including the ROC value (where applicable)
- » Fees of £1 per MWh (plus VAT) will be subject to a minimum and maximum
